Professional Summary

Results-driven Full Stack Developer with 5+ years of experience building scalable web and mobile applications, including enterprise ERP and POS solutions. Skilled in React.js, Next.js, Node.js, Express.js, MongoDB, React Native with strong expertise in full-stack architecture, RESTful APIs, authentication, and database optimization. Passionate about building high-performance, user-focused solutions that solve real-world business challenges.

Professional Experience

FULL STACK DEVELOPER · Code5 Technologies — Lahore, Pakistan Lahore, Pakistan · Mar 2025 - Present

- Developed scalable enterprise SaaS, ERP, ISP/Telecom, and client platforms using React, Next.js, Node.js, Express.js, and MongoDB.
- Developed DragonPro, an ISP/Telecom platform with 30+ modules, prorated billing, payment collection, multi-tenant RBAC, real-time Socket.IO events, inventory, and AWS S3 integration.
- Built and maintained Sirajiya, WellNet, and iBoothme platforms, implementing REST APIs, dashboards, authentication, cloud storage, and production deployments.

FULL STACK DEVELOPER · MCode Technologies — Lahore, Pakistan Lahore, Pakistan · Jan 2024 - Mar 2025

- Developed core modules for MCode POS, a restaurant and hotel POS platform covering sales, inventory, accounts, and business operations.
- Engineered EIMS, an education management platform with student management, accounts, inventory, and reporting.
- Built secure REST APIs and optimized MongoDB aggregations, schemas, queries, and React/Redux interfaces.

Frontend Developer · Mashkraft — Garden Town, Lahore Garden Town, Lahore · Sep 2023 - Jan 2024

- Developed responsive and performance-focused websites and web applications using React.js, JavaScript, HTML5, and CSS3.
- Built healthcare booking workflows for ConsidraCare and dashboards/menu-management features for AppNGO.
- Implemented responsive UI, animations, API integrations, and cross-browser compatible interfaces.

Frontend Developer · Aresync IT — DHA Phase 3, Lahore DHA Phase 3, Lahore · Feb 2023 - Sep 2023

- Converted Figma designs into pixel-perfect, responsive production interfaces.
- Integrated REST APIs and developed reusable frontend components using JavaScript, Bootstrap, HTML5, and CSS3.
- Optimized frontend assets and stylesheets to improve PageSpeed and overall website performance.

Projects

DragonPro – Enterprise ISP & Telecom Management Platform

[React](#) [Node.js](#) [Express](#) [MongoDB](#) [Socket.IO](#) [AWS S3](#)

- Developed an enterprise ISP/Telecom management platform covering customers, subscriptions, billing, invoicing, and service operations.
- Engineered prorated billing, payment collection, invoice settlement, and multi-tenant RBAC across 30+ modules.
- Built multi-location inventory and asset tracking with real-time updates and secure AWS S3 document storage.

Multi-Tenant Enterprise SaaS ERP Platform

[React](#) [Node.js](#) [Express](#) [MongoDB](#) [Redux](#) [Docker](#)

- Developed a scalable multi-tenant ERP/POS platform with secure tenant data isolation and role-based access control.
- Built modules for Accounting, Invoicing, Inventory, Procurement, HR/Payroll, Manufacturing, and POS.
- Implemented JWT authentication, MongoDB transactions, barcode/SKU management, and real-time inventory.

DataLiteX – Metadata-Driven Low-Code ERP Framework

[React.js](#) [Node.js](#) [Express.js](#) [MongoDB](#) [Redux Toolkit](#) [Ant Design](#)

- Developed a metadata-driven low-code ERP framework with dynamic forms, runtime validation, configurable UI layouts, and automated Node.js code generation.
- Implemented multi-tenant/multi-branch architecture, ERP modules, hierarchical access control, and interactive administration dashboards.

Enterprise Management System (IMS) & CRM

[Next.js](#) [React](#) [MongoDB](#) [Supabase](#) [AWS S3](#)

- Developed an enterprise IMS/CRM platform managing Sales, Marketing, Accounts, Events, and Development workflows.
- Built proposals, invoicing, PDF generation, authentication, and RBAC features using Next.js and Supabase.
- Integrated AWS S3 and third-party APIs with optimized data tables, filtering, exports, and analytics dashboards.

iBoothme / BoothVerse – Interactive Marketing & Photobooth SaaS

[React](#) [TypeScript](#) [Node.js](#) [PostgreSQL](#) [Supabase](#) [AWS S3](#) [Three.js](#) [GSAP](#)

- Developed a SaaS/CMS platform for digital photo booths, event marketing, lead management, analytics, and SEO.
- Built high-performance 3D interactive experiences, animations, SSR/SSG, REST APIs, cloud media uploads, and dynamic SEO.
- Developed document management, PDF/CSV workflows, analytics dashboards, and production deployments using AWS S3, Docker, and Nginx.
- Achieved 90+ Lighthouse performance scores across key interactive experiences.

OfficeIMS – Enterprise ERP & Office Management System

[React.js](#) [Node.js](#) [Express.js](#) [MongoDB](#) [Redux Toolkit](#) [AWS S3](#) [Docker](#)

- Developed an ERP/CRM platform covering Sales, Inventory, Finance, HR, Leads, Quotations, Invoicing, and role-based access control.
- Built reusable business modules, dashboards, API integrations, and secure document workflows for enterprise operations.

Education

BS Computer Science · Computer Science · 2021 - 2025
[Virtual University, Lahore](#)

Skills

Frontend Engineering

[Next.js & React.js \(SSR, SSG, Server Components\)](#) [JavaScript \(ES6+\) & TypeScript Basics](#)

[State Management: Redux Toolkit, Context API](#)

[Styling & UI: Tailwind CSS, Material UI, Bootstrap 5, CSS3, Responsive Design](#)

Backend & APIs

[Runtime & Framework: Node.js, Express.js](#) [API Architecture: RESTful APIs, Next.js API Routes, WebSockets](#)

[Security & Auth: JWT Authentication, Bcrypt.js, RBAC \(Role-Based Access Control\)](#)

Databases & Cloud Storage

[MongoDB & Mongoose ODM \(Aggregations, Schema Design\)](#) [Cloud Storage: AWS S3, Cloudinary](#)

AI-Augmented (Tools & Workflows)

[AI & Agentic IDEs: Cursor AI, Google Antigravity, GitHub Copilot](#)

[LLMs & Reasoning: Claude 3.5 Sonnet, ChatGPT \(GPT-4o\), Google Gemini, DeepSeek](#)

[Engineering Acceleration: Rapid Prototyping, Prompt Engineering, Automated Refactoring & Testing](#)

DevOps, Tools & Workflow

[Docker, Docker Compose, Nginx](#) [Hosting Platforms: Vercel, Netlify, Render](#)

[Version Control & Testing: Git, GitHub, Postman, VS Code, Vite](#)

Core Competencies

High-Performance & Scalable Web Apps [Cross-Browser Compatibility & Technical SEO](#)
[Clean Code Architecture & Modular Design](#)

Achievements

- DragonPro ISP Platform · [Code5 Technologies](#)

Mar 2025 - Present

Built DragonPro ISP/Telecom platform with 30+ modules serving multiple tenants
- Multi-Tenant RBAC System · [Code5 Technologies](#)

Jan 2024 - Present

Engineered a reusable multi-tenant RBAC system adopted across 5+ enterprise products
